

GUYMASTER Release Notes  
For version 8.0.4 as of April 19, 2024

1. Fixed: The Displacements and Rotations resultant graphical representation page in the DrawTower module. The maximum graphical results included results from all loading conditions even with the suppressed maximum displacement flag.
2. Change: The loading condition reference label, in the self-supporting tower report, are now showing upper case letters instead of lower case to mach the same convention as in GUYMASTER interface.
